SBD Servo drive

This page describes the **SBD servo drive** used with the Green Drive ISO tubular linear motors. It is a compact servo drive that provides the power stage and the control for the motor, with support for the standard feedback options.

The detailed information is available on the SBD servo drive page: SBD Servo Drive

Overview

- The drive is matched to the Green Drive ISO motor series. - It supports the feedback options available for the motor (SIN/COS, Hall, BISS-C, ...). - Configuration and commissioning are performed with the NILAB Starter PC software. - For the full technical data, the parameter list, and the connection details, refer to the dedicated SBD servo drive page.
