Cablechain option

This page shows the **cable chain option** for the LM linear axes. The cable chain protects and guides the cables during the movement.

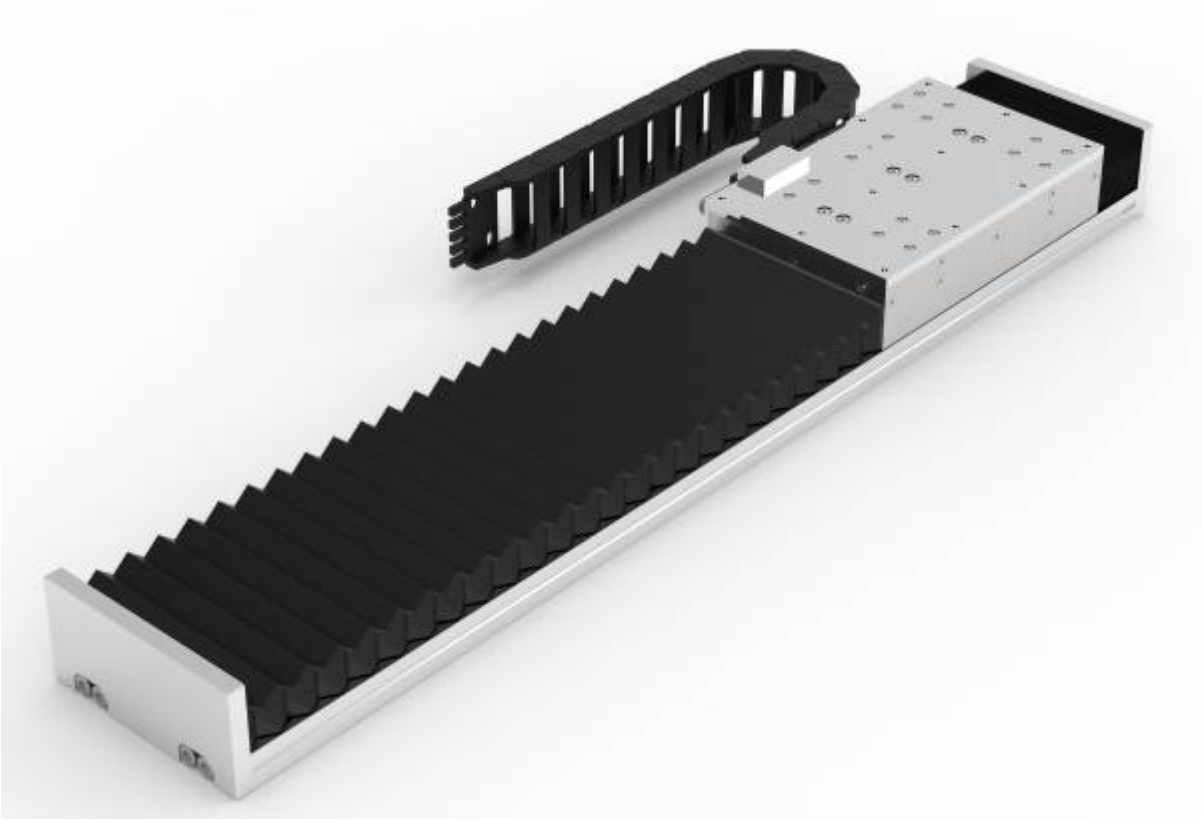

CH - Horizontal mounting

CV - Vertical mounting

CS - Side mounting

Notes

- The cable chain is available in horizontal (CH), vertical (CV), and side (CS) mounting versions. - Select the mounting type according to the axis orientation and the available space. - The cable chain protects the cables and prevents excessive wear. - Refer to the accessories page for the related mounting set.
