Force profile

This page shows the **force profile** of the Maglift magnetic spring. The curves show the force over the stroke for the available sizes.

Maglift 12/17/22

Maglift 40/50/60

Notes

- The curves show the counterbalance force over the stroke for each size. - The force is constant over the stroke with a ±10% tolerance. - Choose the size according to the moved mass and the required counterbalance. - For the selection and the mounting, refer to the start page and the mounting accessories page.
