MEQI Ballscrew actuator

MOTOLAB GmbH, a company controlled by NILAB GmbH (Austria) and Motus-tech srl (Italy), offers integrated BLDC motors combined with ball-screw actuators in different sizes and with a rated power of up to 900 W, combined with different ball-screw actuator flanges.

Thanks to their excellent dynamic performance, these smart brushless DC servo actuators are ideally suited for applications with fast acceleration, such as medical engineering, automation, robotics, or special machine construction.

Item
Precise position, speed, and torque control
Magnetic single-turn absolute encoder
Digital and analog inputs, digital outputs
Integrated temperature monitoring to prevent overload
Smooth running
Long service life
