Motion Studio Software

Motion Studio is the commissioning software for the NL7 servo drive. It provides a graphical interface for configuring parameters, setting up motion profiles, monitoring real-time data, and diagnosing the drive.

The commissioning software for the NL7 servo drive can be downloaded here: https://www.nilab.at/download/motion-studio-for-nl7-servo-drive/?wpdmdl=7046&refresh=65f065ac8c2691710253484

What Motion Studio is used for

- Parameter configuration and commissioning of the drive. - Setup and test of motion profiles and homing sequences. - Real-time monitoring of drive status, position, velocity, and torque. - Diagnostics and fault analysis during commissioning and maintenance.
